Subject: Brix Maritime

John,

This email confirms receipt of your voicemail message today regarding sampling of the recently installed monitoring wells at the Brix Maritime facility.

It is my understanding that two of the five planned monitoring wells were installed last week. You indicated in your message that both wells contain water, however, MW-3 contains about 1' of water. You indicated that you plan to develop the wells or purge them dry on Wednesday July 23, 2002 and then plan to sample them on Thursday or Friday.

Please give me a call next week after you sample the wells and we can further discuss the timing of the installation of the remaining 3 wells. Thanks.
